Fuel and Sulphur Surcharge 2018

Fuel Surcharge

30 November 2018
Side 1/5

PostNord is applying the conditions for fuel surcharge for parcel, pallets, groupage (Nordic), part load (Sweden), courier and InNight, which may be found in the General Terms and Conditions (PAKN) in PostNord's customer agreement. More information about Fuel Surcharge 1 January 2019 see postnord.se/priser.

The fuel surcharge is calculated as a percentage of the freight cost, excluding any supplemental services, for both domestic and international parcels, pallets, groupage (Nordic), part load (Sweden) and InNight. For Courier, the surcharge applies to ground transport. The surcharge appears as a separate item on the invoice.

The percentage rate is established each month based on the transport cost index (TKI) provided by the Swedish Association of Road Haulage Companies (Sveriges Åkeriföretag).

Sulphur Surcharge

The new Sulphur Directive*, which came into force on 1 January 2015, regulates the highest permitted sulphur content in maritime fuel. The directive means that from the start of the year the sulphur content in maritime fuel used by shipping companies must be dramatically reduced from the current level of 1.0% to 0.9%.

This is why PostNord has started adding an extra surcharge applicable to certain countries for the InNight service effective from 1 January 2015. PostNord starts adding an extra surcharge to additional services and countries with effect from 1 February 2015.

The sulphur surcharge is calculated as a percentage of the freight costs, excluding any additional services. The relevant services and countries are shown in the table (PDF). The surcharge is shown separately on the invoice.

*The European Parliament and Council directive (directive 1999/32/EC, later amended by directive 2012/33/EC)

Current value for December

Information regarding the current level of surcharges is updated at the end of each month in this document, also see postnord.se/priser.
